OUR SERVICES

Established in 1953 in the northwest region of Canada, our company has played an important role in Kazakhstan since 1998. Supported by Arctic Group International's branch offices in Canada, Libya, and the Netherlands, AGI-CDCS brings a high degree of safety and reliability to every job. Our team of experts have decades of oilfield experience around the world.

In 2015, our joint venture AGI-CDCS Kazakhstan JV was formed. This strategic partnership expanded our footprint in the West Kazakhstan region, building on our already strong reputation for efficient, safe, and user-friendly solutions. Our achievements and client recognition in both performance and safety speak to our continued focus on employee development, quality assurance, and social conscience.

Our history

Our services

HEAVY HAUL LOGISTICS AND TRANSPORTATION

AGI-CDCS is the leading provider of heavy load transportation services, catering to the oil and gas, mining, and energy transition/renewable sectors.

With over 25 years of experience in Kazakhstan, we have honed our expertise to deliver unparalleled solutions to our clients' diverse needs.

Our modern equipment fleet, including cutting-edge cranes ranging from 55 tons to 300 tons and heavy machinery, is meticulously maintained to ensure precision and efficiency in handling large loads. Whether it's moving mining equipment or transporting components for renewable energy projects, AGI-CDCS is committed to meeting our clients' requirements reliably and effectively.

Our services

RIG MOVING

We've built a lasting reputation for safely moving rigs of all sizes with a focus on safety, efficiency, and professionalism.

Experience and pride in what we do allows us to complete every move without incident, or delay.

LIFTING SERVICES

Utilizing our diverse fleet of cranes ranging from 55 to 300 tons, all lifts are planned and executed by experienced operators and lifting specialists, ensuring it is done efficiently and safely.

OFFSHORE CONSTRUCTION & DREDGING SERVICES

AGI provides comprehensive planning, designing, project management, supply & logistics as well as implementation of complex offshore construction and dredging services.

FLUID HAULING

Our fleet of fluid hauling equipment is state of the art and fit to tackle any job. All our operators are certified to haul hazardous materials and are experienced in hauling a multitude of various fluids.

Our services

CONSTRUCTION & DESIGN SERVICES

From start to finish, our team of experts deliver quality results. We are experienced in conductor drives, well pad construction, roadways, building renovations/repairs, and more.

PIPELINE CONSTRUCTION SERVICES

Comprehensive services including construction and maintenance, reliability and integrity work, utility line servicing, and horizontal boring are delivered accurately, safely, and on time.

SPECIALIZED EQUIPMENT RENTAL

An extensive list of well-maintained equipment including man lifts, generators, light towers, earth moving equipment, and more are available for short- and long-term rental.

SUPPLY CHAIN MANAGEMENT SERVICES

Customers are assured of accurate and timely delivery of project materials, equipment and services. Services range from preparation of contracting and procurement strategies to turn-key onsite material management.

Our equipment fleet

AGI-CDCS's full-service base spans 8 hectares in the Tengiz Rotational Village. All equipment maintenance repairs are completed in our more than 2,500m² of shop space.

**CRANES LIEBHERR 55 - 300 TONS
CAPACITY (MAJORITY OF CRANES OVER

Advantages for our clients

PEOPLE

Our team consists of dedicated, highly skilled professionals and specialists. Together, they make us a leader in our field.

A thorough recruitment process and training regime, coupled with a progressive management style enables our people to be the best in the industry.

HSE

Safety is a key focus in every job. Our company breeds a safety culture that instills in every employee the responsibility for the health and safety of themselves and the people and environment around them.

CLIENT-ORIENTED APPROACH

Clear and continuous communication with our customers is paramount to a project's success. Our goal is to deliver a user-friendly experience, and the highest degree of professionalism at all levels.

LOCAL CONTENT STRATEGY

We are committed to enhancing and developing the quality of life in the communities we work in. We meet this commitment by working with our employees, suppliers, and the local community to identify areas needing our support.

Our Kazakhstani content is above 97%.

SPARE PARTS WAREHOUSE

Purchasing from North America, Europe, Asia and the CIS region, our average annual turnover is nearly 2 000 000 items spanning over 20 000 SKUs. On average, we store nearly 1 000 000 pieces of inventory in our warehouses in Tengiz, contributing to uninterrupted activities.

TRAINING & DEVELOPMENT

An experienced, in-house team delivers exceptional training aimed at exceeding operational and safety requirements.

Stand-out employees are regularly selected for specialized 3rd-party trainings both locally and abroad, giving our team a heightened level of professionalism that is second to none.

Project Experience

For Tengizchevroil's Future Growth Project AGI-CDCS constructed four muster areas at strategic points throughout the Tengiz Operating Zone. This turn-key project was delivered on schedule, complete with all necessary markings and weather-proof storage containers for H2S filters.

SITE PREPARATION:

Over 180,000 square meters of topsoil expertly cleared and leveled, readying the area for the next stages.

EQUIPMENT:

A range of specialized equipment including personnel transporters, dump trucks, dozers, excavators, graders, compactors, and water trucks, all coordinated by our experienced project team.

INSTALLATION:

Materials were strategically placed and spread across each site, with attention given to any soft spots we encountered.

QA/QC:

Compaction testing was carried out at key points, ensuring long-term stability of the locations.

K-15 INSTALLATION OF METAL CELLAR

June 2023

Existing well was excavated and continuously dewatered, while welding repair works were performed on the wellhead. A custom steel cellar was designed, fabricated, installed and oriented over the wellhead, then the site was backfilled and restored to allow for future workover rigs.

Project Experience

DISMANTLING AND INSTALLATION WORKS AT T-114 WELLHEAD

October 2022 - January 2023

The meticulous dismantling and reconstruction of a concrete cellar at the T-114 wellhead.

DISMANTLING:

Expertly removing the old structure to make way for the new.

EXCAVATION WORKS:

Ensuring a solid foundation for the future.

DEWATERING, CONCRETE WORK:

Continuous dewatering to manage ground moisture while forms were installed and concrete poured.

RESTORATION OF A ROTARY SKID

June 2023

SANDBLASTING, PAINTING, AND REPAIRS

Lifting equipment was used to position and hold the skid in place, while a rigorous process of restoration and preservation measures were taken. Sandblasting removed rust, welding works strengthened the overall structure and key lifting points, and professional painting

Project experience

URGENT ROOF REPAIR

A client's warehouse facility experienced a leak in its roof, necessitating immediate repairs. Our team responded by ordering and delivering the required materials and successfully completed the repair in a timely, but safe manner.

**TIMELY MATERIAL
PROCUREMENT AND
DELIVERY**

**CERTIFIED PERSONNEL
FOR WORKING AT
HEIGHT**

**PROVISION OF
CERTIFIED CRANES
AND MANLIFTS WITH
SKILLED OPERATORS**

WELDING WORKS

AGI welders are capable of building metal construction for facility requirements. With draftsman support they can build with high precision according to any drawing, or design. Custom packaging for transportation of high value goods like the Christmas tree pictured below is an example of our work.

Project experience

HORIZONTAL BORING - KPJV TRENCHLESS PIPE CROSSING

2016

Due to the presence of high pressure gas lines, a busy highway, and high voltage overhead lines, traditional open trench construction methods were not possible. Using the most current and reliable methods, AGI came up with a fit to purpose engineering solution, utilizing an engineered cradle for a hydraulic piling hammer. Using this method, ground disturbance was minimized, and the need for costly traffic diversions and gas line shutdowns were avoided.

OFFICE & ACCOMMODATION CONSTRUCTION & MAINTENANCE

2023

RENOVATIONS:

Supporting customers with various renovation works, such as door and window installation, drywalling, shower and toilet room installation.

HVAC SERVICES:

installation and maintenance, pre summer checks.

Social Responsibility

AGI-CDCS KAZAKHSTAN JV LLP firmly believes in giving back to the community in which we conduct our business. Over the years we have supported the Zhylyoi region and Atyrau oblast with various support including food donations, equipment for community facilities, and civil construction services.

Food Hampers – Every month we work with local officials to deliver essential food items to 40 families in need.

Hospital Equipment – Crucial medical equipment was purchased and delivered to the local hospital, helping countless residents get medical attention previously only available hundreds of kilometers away.

Berm Repair – Each Spring and Fall, rivers in Kul'sary experience high water levels that threatens flood damage to nearby roads and homes. We regularly send heavy machinery and personnel to build up the existing berm to prevent such flooding.

Women's Shelter Renovation – In 2023, we performed much needed upgrades and repairs to a women's shelter in Kul'sary, including new furnishings and other comforts, ensuring women from the surrounding areas have a safe place to stay when needed.

Local Team Sponsorship – For 10 years, we have sponsored a local men's football team, branding them with the equipment they need to stay active and healthy.

Letters of appreciation - Our support is gratefully received by people and the Akimat of the Zhylyoi region.
